Printing to Student Accessible Printers

Setup Instructions for Windows 7
Go to the Start menu, and type the printer’s path into the blank at the bottom (it normally says “Search Programs and Files”):

![Image of the Start menu with typed path]

Living Learning Center
LLCSTUDENT - `\printbod.wuad.washburn.edu\llcstudent`

Washburn Village
WVSTUDENT - `\printbod.wuad.washburn.edu\wvstudent`

Mabee Library
MABPOOL - `\printbod.wuad.washburn.edu\mabpool`

After entering the path, press Enter. In a few seconds, you’ll see the following window. Type your WUAD username and password as shown. (If you don’t know your WUAD username and password, you can go to Bennett 104 and get it.)

![Image of the Windows Security window]

**WARNING:** you MUST type the WUAD\ before your username and you MUST click “Remember My Credentials”. It won’t work otherwise.

Once you have connected to the printer, a box will appear asking to install drivers. Click Yes.
Using the Printer
Just print to “LLCSTUDENT on printbod.wuad.washburn.edu” (or WVSTUDENT, if you used that printer.)
