

## FACULTY HANDBOOK COMMITTEE

**Problem Statement:** The Faculty Handbook was drafted more than forty years ago and has been revised and modified several times since then; however, it would appear the Handbook has not been reviewed consistently in its totality for uniformity, clarity, and cohesiveness.

**Proposal:** A group of academic deans, faculty, and other administrators have formed a committee to review the handbook in its totality. They will revise where needed and clarify areas that are currently open to interpretation and are applied inconsistently.

**Goal:** Generate a Faculty Handbook that reflects the decisions of the University, and that all sections are congruent with the document as a whole. Ideally, the handbook would have an index for ease of use and a searchable index in the online version as well.

**Request:** If YOU know specific policies or sections that seem unclear, please let a member of the review committee know.
