## **University Catalog Updates**

Organization and accuracy of University Catalog is the responsibility of the AVPAA

Sections of University Catalog are sent electronically to the unit responsible for it (e.g., Student Life sections to Student Life, Student Records sections to University Registrar, Academic sections to Academic Units, etc.)

Units make changes (turning on track changes feature) and return sections electronically

AVPAA checks proposed changes to ensure unit-level changes have been approved at appropriate level

AVPAA adds/changes/deletes approved academic/administrative policies. Curricular/academic/administrative changes which have been approved at all levels except the BOR by the time of catalog printing are included in the University Catalog (with those items still requiring BOR approval including notation "Pending Board of Regents Approval"). Any changes approved after the printing of the catalog but before the end of the fiscal year (June 30) can still be effective the upcoming fiscal year and are noted in an online section of the University Catalog entitled "Addendums to XX Catalog."
