B. Vote of no confidence in Mike Gunter as head of Information Systems and Services (ISS) (Action Item 09-01).

1) Mike Gunter read a statement in which he outlined what he calls the successes of ISS: wireless Internet, increased disk space, clickers, more desk support, and recent hires such as a Webmaster and Instructional Designer. He stated that ISS does not make policy and that he did not know how he could have done things differently with HiPACE. He added that he believes WUAD is a good thing and that malware can do less damage if the computer does not have administrator access. He stated that university hardware was approved at the steering committee.

2) Senators proceeded to ask Gunter several questions about the following issues:
   a) No academic computing is figured in the organization chart in the Ebert review.
   b) The groundswell of faculty disconnect.
   c) The lack of full time teaching faculty on the ITC and lack of communication with the faculty on the part of the Steering Committee.
   d) Gunter’s unwillingness to share the HIPACE password with faculty.
   e) The lack of sound academic policy
   f) The issue of security: is there a trade off between convenience and security?
   g) Gunter’s perceived lack of trust in faculty in regard to administrative control of computers.
   h) Concerns over the recent security document.
   i) Lack of public access to computers.

3) When the discussion with Gunter ended at 4:45, there was a motion that passed to call the question. The senators voted on the motion and the ballots were counted. Here is the final tally:

   **27** senators voted in favor of the motion of no confidence in Mike Gunter as head of Information Systems and Services.
