The General Education Committee met April 1, 2008, to evaluate transfer petitions and prepare to review those Washburn general education courses up for review in AY 07-08.

Academic Affairs had received fifty-five (55) petitions from students.

- 27 courses petitioned were approved for general education transfer
- 13 courses were NOT approved for general education transfer
- 7 courses were sent to department chairs and were determined to be direct equivalents of either general education courses or university requirement courses
- 8 courses were found to have already been approved for general education credit
- The remaining courses are awaiting determination by department chairs

Department General Education Reviews were then distributed among the committee members, who were set in teams of two or three. The results will be written once the teams have completed their reviews and sent to Dr. Nancy Tate.

Nancy discussed the review rotation she had developed and passed out copies to the committee members. Linda will contact department chairs and ask for courses that are semester-specific. The committee also discussed the issue of reviews needing to be postponed because chairs did not get them done and a new process of notification was adopted.
