SoB: If you find the level of financial compensation not acceptable, briefly state why not.

1. I think that supervising a WTE scholarly project will take more time than is reflected by this amount.

2. I do not understand all of the questions and really do not know how to answer some of them at this stage as there are too many unknowns. I am hesitant about voicing any opinion as I will likely change it later.

3. Since we are being compensated for our time spent on WTE, and since our salary is what the university compensates us for our time fulfilling a FT appointment doesn't it seem logical that WTE compensation be a percentage of our salary. Say 1.5% of our yearly salary.

4. Should be equal.

5. It is probably too low.
