

Earth Day Week

April 18th-22nd

History about Earth Day:

- The first earth day occurred in the spring of 1970 where a nationwide grassroots demonstration took place on behalf of the environment.
- On the first Earth Day in 1970, 22 million Americans celebrated clean air, land, and water.
- Earth Day 1970 made it clear that we could summon the public support, the energy, and commitment to save our environment
- The primary objective in planning Earth Day was to show the political leadership of the Nation that there was broad and deep support for the environmental movement
