

Voice Mail Password Resets

Have you changed your voice mail password and forgotten it?

Visit <https://secure.washburn.edu/voicemail-reset> .

For security reasons, we are asking you to authenticate with your MyWashburn username and password. After the form is submitted, a ticket will be created in BodPrints and you will receive e-mail confirmation of your request.

Within one business day (8 a.m. - 5 p.m., Monday through Friday), your password will be reset to the original password (12 followed by your extension). You will receive an e-mail letting you know when the reset has occurred.
