Research Project Selection

Prior to selecting a Research Director:

1. Students must set up a research conference appointment to talk with all tenure track faculty members about the individual faculty member's research projects.

2. Verify completion of the conference by obtaining the signatures of each faculty member on this form.

3. Provide the name of the faculty member who will serve as research director and title of research project on this form and obtain the directors initials on the project.

4. Submit the completed form to the departmental chair.

Faculty Signatures

Name of Student: __________________________________________

Name of Research Director: __________________________________

Title of Project: ____________________________________________

Regardless of your research interest, all students must learn safe laboratory procedures including proper storage of hazardous waste. Please contact the laboratory supervisor, DeAnn Leach, to set up a time for her to go over these items with you. When your instruction is complete, have the Laboratory Supervisor sign. Return a copy of this to the department prior to initiating research.

DeAnn Leach, Laboratory Supervisor
