Quotation 1	Confusing this issue is the overlapping nature of roles in palliative care, whereby “medical needs are met by those in the medical disciplines; nonmedical needs may be addressed by anyone on the team” (Csikai & Chaitin, 2006, p. 112).
Quotation 2	Miele (1993) found that “the ‘placebo effect,’ which had been verified in previous studies, disappeared when [only the first group’s] behaviors were studied in this manner” (p. 276).
Quotation 3 (more than 40 words)	Miele (1993) found the following: The “placebo effect,” which had been verified in previous studies, disappeared when behaviors were studied in this manner. Furthermore, the behaviors <i>were never exhibited again</i> [italics added], even when reel [sic] drugs were administered. Earlier studies (e.g. Abdullah, 1984; Fox, 1979) were clearly premature in attributing the results to a placebo effect. (p. 276)
