Part I Prior Curriculum - Actuarial Science track		

The track in Actuarial Science currently requires 3 of the 4 insurance courses from the School of Business, chosen from BU 374 (Principjk,s of Risk and Insurance), BU 375 (Property and Liability Insurance), BU 378 (Life Insurance), and BU 75 (Theory o Insurance). The latter three courses have not been regularl offered by SOBU in the past two years, due to lack of studen demand.

Part II New Curriculum

We will now require Actuarial Science degree seekers to take all 3 of the following courses: BU 374 (Princip, s of Risk and Insvapce), BU 381 (Business Finance), and BU 483 (Investments). All MA designated courses for the Actuarial Science requirements remain unchanged.

Date:

July 29, 2005

To:

Professors Kevin Charlwood and Mike Mosier

Department of Mathematics, Washburn University

From:

Russ Smith, Associate Dean, School of Business

Re:

Changes in Business Courses Used in the Actuarial Program

Thank you very much for the opportunity to review your proposal to drop and add courses offered by the School of Business as requirements in the Actuarial Science Specialization within the Major in Mathematics.

We understand the proposal to be to:

- 1) no longer require BU 375 Property and Liability Insurance, BU 378 Life Insurance, and BU 475 Theory of Insurance;
- 2) to continue to require BU 374 Principles of Risk and Insurance; and
- 3) to add as requirements BU 381 Business Finance and BU 483 Investments.

From our point of view, the revised program will be much easier to administer since BU 381 and BU 483 are program requirements. BU 381 is required for all BBA students and is offered about three times per semester. BU 483 is required of all finance majors and is offered twice per year, generally once per semester. The three courses that are being dropped are offered, as you know, only occasionally when our two programs together think we can get reasonable enrollment in a section.

Thank you very much for consulting with us. We look forward to future collaboration in this program and in the other areas where we are using each other's courses.

Cc: Dean Sollars

PROGRAM CHANGES/DELETIONS

Accepted by CFC	Trumall Approved	1/16/05
General Information: Change (X) Deletion	on ()	12/09/05
1. Complete revised course description (including	g course number, title, credits, a	nd prerequisites)

Deletions

- Is the course being deleted from the catalog being replaced with another course? yes () no (If so, please explain.
- 3. Is the content of this course being distributed to another course or group of courses?

Changes

4. Describe the nature of the proposed change.

The current catalog (05-06) lists four choices of upper-division Math classes for the BS in Computer Information Sciences: MA310 Operations Research, MA330 Math Models, MA343 Applied Stats, and MA344 Math Stats. The students choose one class from this list. However, MA330 is now a capstone class and MA344 has MA343 as a prerequisite. We are removing MA330 and MA344 as choices, so that the student will choose to take either MA310 and MA343. We are aware that MA310 has not been offered in some time, but we hope it will be viable again if our enrollment increases.

5.	Do you currently have the equipment and facilities to teach this class with the proposed change?
Yes	

PROGRAM CHANGE Review Recommendation Department Chair Division Chair Division Chair Department Chair Off Education (If course relates to teacher certification program.) Accepted by CFC College Dean PROGRAM CHANGE Review Review Paccommendation Date 10/05/05 Recommendation 11/2/05 11/2/05 10/12/05

1. Complete revised course description (including course number, title, credits, and prerequisites)

Because of recent additions and deletions in the Athletic Training Major (BS degree program), formal notification and approval from various academic approval committees is necessary. The following courses have been added to or dropped from the Athletic Training curriculum. All Physical Education numbered courses are part of the Required Courses for the AT Major. Courses in Allied Health shall be part of the Correlated Requirements.

PE 256, Sports Injury First Aid, (no prerequisites) and **PE 357, Sports Performance and Reconditioning** (prerequisite: PE 326, Physiology of Exercise) are to be added.

PE 258, Clinical Experiences in Athletic Training-Introduction (1) and PE 493, Clinical Experiences in Athletic Training-Capstone (2) have also been added to the Athletic Training Required Courses. All students must have been admitted into the Athletic Training Education Program (ATEP) for both of these courses. In addition, PE 493 must have completed PE 455 (Organization and Administration of Athletic Training) and PE 492 (Clinical Experiences in Athletic Training-General Medical).

AL 315, Allied Health Pharmacology (no perquisite) and **AL 320, Human Disease** (prerequisite: BI 275 and BI 255) to be added to be added as required correlated courses.

Total number of required hours for the Athletic Training major from within the PE course list is 48.

Deletions

- 2. Is the course being deleted from the catalog being replaced with another course? Yes () No (X) If so, please explain. Nothing is being deleted from the catalog.
- 3. Is the content of this course being distributed to another course or group of courses?
- PE 256, Sports Injury First Aid (2) replaces PE 271 in the athletic training major curriculum.
- PE 357, Sports Performance and Reconditioning (2) replaces PE 400 in the athletic training major curriculum.
- PE 455, Organization and Administration of Athletic Training replaces PE 306, Administration of Physical Education and Athletics in the athletic training major curriculum.
- AL 315, Allied Health Pharmacology (2) and AL 320, Human Disease (3) replaces NU 313 in the AT curriculum.

 Changes
- 4. Describe the nature of the proposed change.

College Faculty

General Information: Change (X)

These modifications are designed to communicate program changes to University Registrar and Degree Auditors.

5. Do you currently have the equipment and facilities to teach this class with the proposed change?

Yes

Ross Friesen

Department of Health, Physical Education, and Exercise Science

From:

Russ Smith, Associate Dean, School of Business

Re:

Changes in Business Courses Used in the Sport Management Program

Thank you very much for the opportunity to review your department's proposal to drop and add courses offered by the School of Business as concentration requirements in the Sport Management Concentration within the Bachelor of Arts in Physical Education degree program.

We understand the proposal to be to make changes within the list of courses that can be used for the required six hours of electives from courses offered by the School of Business, and specifically to:

- 1) drop from the list BU 366 Sales and AC 225 Managerial Accounting and
- 2) add to the list BU 364 Consumer Behavior and BU 470 Entrepreneurial Clinic.

We anticipate no problems with the revisions, which increase the number of options that are realistically available to the students in the program. For example, BU 364 Consumer Behavior is a program requirement in the marketing major and is offered every semester. BU 470 Entrepreneurial Clinic is offered less frequently, but is available, unlike BU 366 Sales, which we don't anticipate offering at the present time.

Thank you very much for consulting with us. We look forward to future collaboration on this program and in the other areas of mutual interest.

Cc: Dean Sollars

PROGRAM CHANGES/DELETIONS

Department Division Dean Dean Dean Department Ross Fruise Corson Malburge	Recommendation Approve Approved	11/2/05
Dept. of Educ(If course relates to teacher certification program.)		
Curriculum Committee Joran B. Sunt	Recommended	11/30/05
Accepted by CFC	K. Breezemel	12/7/05
College Faculty	Approved	12/09/05
General Information: Change () Deletic	on (x)	

1. Complete revised program description.

Under "The major in Physical Education: Bachelor of Arts Degree": "The Physical Education core requirements include the following 19 credits: HL 152, PE 250, PE 320, PE 321, PE 326, PE 440, PE 496."

Explanation: PE 271 - First Aid is removed from the list of core requirements for the B.A. degree.

Deletions

- 2.Is the course being deleted from the program being replaced with another course? yes () no (x)
- 3. Is the content of this course being distributed to another part of the program? yes (x) no ()

PE 271 - First Aid will become a prerequisite for PE 494/495 Internship. All B.A. concentrations currently require the internship.

Explanation: The core curriculum includes principal subdisciplines that contribute unique theoretical approaches to the study of health and human movement. First Aid does not meet this test. However, the department values its content and is therefore providing for it in a different manner.

Changes

- 4. Describe the nature of the proposed change.
- 5. Do you currently have the equipment and facilities to teach this class with the proposed change?

BACHELOR OF ARTS DEGREE, HPEES

Core Introduction to Human Movement Studies

Personal & Community Health

First Aid
Motor Learning
Kinesiology

Exercise Physiology
Measurement & Evaluation
Synthesis & Application

Correlated microcomputer course

Introduction to Human Anatomy Elementary Human Physiology

Activity 4 credits activity/teaching techniques/exercise leadership

Interest area 12 hrs PE electives (6 @ 200+, 6 @ 300+)

May be met by concentration credits in PE

HEALTH ED. & PROMOTION: 44 +3

Nutrition for Sport & Fitness
Fitness Testing & Ex. Prescription
Stress Management
Introduction to Addictions
Adult Theories in Aging
Principles of Health Ed & Promotion
Human Disease
Health Psychology
Critical Issues in Health
Health Ed. & Prom. Prog Plan & Eval

1. Complete revised course description (including course number, title, credits, and prerequisites) This is a revision of the Biology minor (see below)

Deletions

- 2. Is the course being deleted from the catalog being replaced with another course? yes () no (X)
- 3. Is the content of this course being distributed to another course or group of courses? NA

Changes

4. Describe the nature of the proposed change.

THE MINOR (optional minor for the Bachelor of Arts degree)

To minor in Biology the student must apply to the department and be assigned a Biology advisor. The twenty hour minimum must be met with course work appropriate for Biology majors, and must include BI102, BI 105 and/or BI110. At least 8 of the remaining hours must be 300 level or higher course work.. No fewer than 10 hours of this minor must have been completed at Washburn University. Students must have a grade of C or better in each course taken to fulfill the minor.

Rationale

Being assigned an advisor in the department will help the student make appropriate choices and navigate pre-requisites, and is consistent with the policy of other departments (for example History, Psychology, Theater).

In the proposed language we stipulated only the lower division courses which are pre-requisites for upper division work, thus allowing students to tailor the minor to their needs with a wider selection of upper division course work than at present.

Finally, we follow the lead of other departments in the Natural Science and Mathematics Division by requiring some hours to have been completed at Washburn.

5. Do you currently have the equipment and facilities to teach this class with the proposed change? Yes (NA)
