

Hanes & Leffingwell Administration Spring Updates

Reimagining the Petals:

- We will be continuing to fund free STI testing for students. We are also looking to potentially connect with community partners to provide free pregnancy testing and STI testing through student health.
- We have been working hard with Dr. Mazachek to transition and make sure our initiatives are not getting lost in the transition, including reworking our Homecoming Award, previously called Top Bods. Please let us know if you have any suggestions!

Starting With the Roots:

- We are hoping the next WSGA administration will continue to have these Roundtable events, but we would appreciate your feedback so it is beneficial for you all. Let us know what you want to get out of these events!
- We are in the process of reworking our budget reimbursement system. Ideally, we would like to start paying for select funding requests up front.

Strengthening the Stem

- We are hoping to have good news to share soon regarding an increase in the minimum wage for student workers. We have been persistently pursuing an increase and are working out the details with executive staff members.
- We met with the VPAA to discuss how to make past syllabi available to students.
